

Contract Maintenance Services

Thinking of expanding to Asia Pacific?

In order to compete in the global manufacturing environment, outsourcing is becoming more essential for success. Outsourcing is not only for product development and manufacturing. Consider outsourcing your system maintenance obligations overseas from us.

Innovation Matrix, with strong on-the-ground presence and intimate knowledge of business practices in US, Japan, Korea, Taiwan and China, offers outsourcing services in the Asia Pacific market. In today's economy with China's nascent entry into the world market, Innovation Matrix can help you leverage the global arena for your system products.

Take advantage of Innovation Matrix's Asia network. With a strong on-the-ground presence in Japan, Korea, Taiwan and China, Innovation Matrix can assist your further growth in any of these technological manufacturing hotspots or their satellites. We have formed a group called the **IM Group** to address the global business growth requirements.

Innovation Matrix provides advanced robotic and vision technology products, system integration and automation consulting services with special emphasis and expertise in global trade opportunities between Asia Pacific and the US. Using our familiarity with Adept robot systems and support, we can extend the services to Adept System Integrators and other automation equipment builders so that even small system integrators can offer their systems overseas. After you create reliable systems for your overseas customers, just leave the worries of system support and maintenance for us to take care of.
